TECHNICAL SKILLS

Front-End: HTML, CSS, JavaScript, Tailwind CSS, Bootstrap

Back-End: PHP, MySQL, Flask, Python

Others: Git, GitHub

EXPERIENCE

IT Intern

University of Southeastern Philippines

August 2023 - May 2024, Davao City, Davao del Sur

- Utilized HTML, CSS, JavaScript, Flask, and MySQL to create and implement an information system that streamlined the archival and digitization of student records.
- Designed system modules to improve efficiency of record management and reduce reliance on manual paperwork.
- Collaborated with a team of interns to analyze workflows, gather requirements, and deliver solutions aligned with office needs.

PROJECT

Archive Records Digitization System

github.com/r-limpz/archival-system • April 2024 - August 2024

- Configured secure digital storage and archival solutions using web and database technologies, ensuring reliable long-term records preservation while complying with access requirements and privacy policies.
- Connected OCR technology with convolutional neural networks (CNN) using Python to enhance text extraction from archival documents facing challenging layouts and print degradation.
- Digitized paper-based records into secure, encrypted formats to support scalable digital archiving and minimize physical storage risks.
- Automated document handling through tagging, validation, and structuring pipelines to improve efficiency and reduce manual processing errors.
- Developed an intuitive web-based interface enabling users to easily upload, manage, and retrieve digitized records.

EDUCATION

Bachelor of Science in Information Technology

University of Southeastern Philippines • Davao City, Davao del Sur • 2024
